PEOPLE**

**MAKE
CLIMATE
IMPACT**

STREAM 01

CLEANTECH VENTURE DAY

The most promising climate ventures from the region pitch here, to the investors and corporates who can scale them.

The region:
Cambridge & East of England

6+

Years of CVD success

£135m+

Raised by pitching companies

200+

Climate-focused investors in our ever-expanding network

20

High potential ventures take the stage

CLIMATE IMPACT

Climate and clean technology is a named priority in the UK Industrial Strategy and in every local growth plan across the region. We know Cambridge and the East of England have the research strengths, ventures, and institutions to respond to this clear and urgent need.

WHAT TO EXPECT

- Keynotes
- Pitches
- Climate Tech Club

100 SEATS AVAILABLE

STREAM 02

INTERNATIONAL ECOSYSTEM BUILDERS' FORUM

Ecosystem leaders, investors, and founders align here on a cross-border agenda for deep-tech scale-ups.

The challenges faced by climate tech innovators find their solutions now, with the collaboration of our three high-impact regional to international innovation clusters.

CCT has the regional edge. When something is moving locally in climate tech, we're the first to know.

CTSC pulls that edge into a UK-EU liaison of cross-border connections, made through their Cleantech Venture Days.

Start2 Group

Start2 Group brings the international cohort, built with their Rise & Scale initiative.

HARNESSING CAMBRIDGE'S LEAD

The Global Innovation Index Ranks Cambridge 1st in Europe and 2nd in the world for innovation intensity.

5000+

knowledge intensive companies

\$191bn

combined ecosystem value

WHAT TO EXPECT
